

Luis Ernesto Cantin Oviedo

Senior Full Stack Developer | .NET • Angular • Azure

ingenieroluisernestocantin@hotmail.com • +57 300 650 2320 • La Unión, Nariño, Colombia

PROFESSIONAL PROFILE

Senior Full Stack Developer with over 6 years of experience delivering enterprise-grade solutions using .NET, ASP.NET Core, C#, Angular, Node.js, JavaScript, jQuery, HTML5, and CSS3. Specialized in designing and implementing scalable web applications, REST/SOAP APIs, and system integrations under Agile/Scrum methodologies. Hands-on experience with Microsoft Azure deployments, CI/CD pipelines via Azure DevOps, version control with GitHub/GitLab/SVN, and advanced database management (SQL Server, PostgreSQL, MySQL, Oracle). Committed to building maintainable, performant software aligned with modern engineering best practices. Proficient in AI-assisted development using Claude Code, OpenCode, and AI coding assistants for code optimization, refactoring, and productivity enhancement in Enterprise environments.

PERSONAL INFORMATION

Date of Birth: October 19, 1980

Place of Birth: Tumaco, Nariño, Colombia

National ID: 87,944,197 — Tumaco

Address: Calle 18 Manzana 2 Casa 12, Barrio El Refugio, La Unión, Nariño

Phone: +57 300 650 2320 | +57 314 449 1444

Email: ingenieroluisernestocantin@hotmail.com

EDUCATION

Universidad de Nariño

Bachelor of Science in Systems Engineering • Pasto, 2011

Universidad Mariana

Specialization in International Accounting and Auditing • Pasto, 2015

CERTIFICATIONS & TRAINING

Microsoft Virtual Academy

Developing in .NET with Visual Studio • Online, 2014

Microsoft Virtual Academy

SQL Server 2008 R2 • Online, 2014

Microsoft Virtual Academy

HTML5 with JavaScript and CSS3 Jump Start • Online, 2014

Microsoft Virtual Academy

Building Web Apps with ASP.NET in Visual Studio • Online, 2014

Microsoft Virtual Academy

Cloud Computing & Windows Azure • Online, 2014

Microsoft Virtual Academy

Introduction to Xamarin • Online, 2014

Microsoft .NET Technology Course

Seminar-Workshop: .NET Technology • Pasto, Nariño, 2007

TECHNICAL SKILLS

Languages & Frameworks	.NET Core / ASP.NET MVC / ASP.NET Core • C# • Angular 18 • Node.js • JavaScript • jQuery • HTML5 • CSS3 • Razor Pages
Databases	SQL Server • PostgreSQL • MySQL • Oracle
Cloud & DevOps	Microsoft Azure • Azure DevOps (Boards, Pipelines, Repos) • Application Insights • CI/CD pipelines
Tools & Practices	SSRS • Entity Framework Core • Unit of Work • Repository Pattern • REST/SOAP APIs • Swagger • Postman • JMeter • iTextSharp / PdfSharp • SendGrid
Version Control	Git (GitHub / GitLab) • TFS / Azure Repos • SVN (TortoiseSVN)
Methodologies	Scrum / Agile • Sprint Planning • Daily Stand-ups • CI/CD
AI-Assisted Dev	Claude Code • OpenCode • AI coding assistants

WORK EXPERIENCE

PERSONAL SOFT S.A.S.

Intermediate Software Developer | Sep 2025 – Mar 2026

Medellín / Bogotá, Colombia

Responsible for designing, developing, and maintaining .NET and Angular-based solutions aligned with business requirements and technical standards across dev, QA, and production environments. Projects: CPM (Manufacturing Process Control), IVC (Industria Vidriera de Coahuila), WTW (Willis Towers Watson).

WTW – ABC Multi Business Services (.NET 6 + Angular 18)

- Implemented new architectural layers in ApiABCMulti (.NET 6): updated IDataUnitOfWork interfaces, extended entity models (CRelate, MRelate), added IRelateRepository methods, and introduced IValidityService for business rule enforcement.
- Created RelatedDto in the CrossCutting layer to reduce coupling and improve data transfer between layers.
- Updated BusinessDbContext and implemented the Unit of Work pattern to ensure consistent and efficient database transactions.
- Developed ValidityController exposing validation endpoints and configured AutoMapper MappingProfile between models and DTOs.
- Angular 18: resolved 5 tracked bugs/requirements (file upload validation, insurer display, UI adjustments, label corrections, insurer deletion logic); implemented dynamic table refresh mechanism for insurer/benefit sync.
- Deployed new features to Staging and UAT environments via Azure DevOps CI/CD pipelines.

IVC – CPM (Manufacturing Process Control, .NET Core 5 + Angular)

- Designed and developed temperature monitoring and control modules for Parison, Corona, and Piston processes within the CPM application.
- Implemented real-time temperature visualization with dynamic bar chart slides and zoom functionality.
- Optimized system behavior through thermal control logic adjustments by date ranges, improving chart response times.
- Built full CI/CD pipeline in Azure DevOps for Dev/QA/Production environments; managed repository branches and merges in GitHub.
- Conducted daily stand-ups, sprint planning, technical client meetings, and critical incident resolution.

IVC – IT Inventory (PHP to .NET 5 Migration)

- Led migration from PHP 5.4.3/Apache 2.4.2/MySQL 5.5.24 stack to .NET 5 MVC, preserving 100% of business logic, UI design, and user experience.
- Migrated modules: Dashboard, Equipment Registration, Responsibility Cards, Records, Reports, Import.

HITSS COLOMBIA S.A.S.

.NET Developer | Feb 2024 – Feb 2025

Bogotá, Colombia

Designed, developed, and maintained .NET-based enterprise solutions; ensured quality, performance, and alignment with business requirements across dev, QA, and production environments.

- Developed billing portal modules using .NET Core 5 and C#: automatic invoice notifications, payment history queries, digital invoice delivery via email, and PDF generation with dynamic criteria per user.
- Resolved PDF generation issues including high response times, formatting errors, and cross-platform compatibility.
- Implemented JMeter-based memory management improvements for load testing scenarios.
- Executed code refactoring and optimization cycles targeting maintainability, for-loop performance, and unoptimized list handling.
- Built CI/CD pipeline in Azure DevOps automating testing, build, and deployment to Azure environments; managed boards and release tracking.
- Configured end-to-end traceability and monitoring via Application Insights: real-time error detection, usage analytics, and behavioral insights.
- Implemented PSE payment gateway integrations with multiple banks.
- Participated in daily stand-ups and sprint planning ceremonies.
- Contributed to the Hidro application refactoring effort, improving code structure, maintainability, and scalability.
- Implemented UI forms aligned with business requirements and UX best practices.
- Administered GitLab repository: branch management, merges, and collaborative workflows.
- Delivered technical onboarding sessions and internal training on the development stack and DevOps practices.
- Coordinated technical client meetings ensuring effective communication and on-time delivery.
- Provided critical incident support, resolving high-priority issues under pressure.

Digital Bank

Developer T3 (Full Stack .NET) | Aug 2021 – Oct 2023

Bogotá, Colombia

Provided support and feature development for the Opain and Smart Cash projects.

- Designed and developed interactive, responsive UI interfaces for Opain's air traffic management platforms, covering 67 billing and flight liquidation causals driven by stored procedure logic; used HTML5, CSS3, JavaScript, Razor Pages, and SQL Server.
- Implemented controllers, views, and backend business logic for Opain and Smart Cash, improving portal usability, navigation, and user interaction across key modules.
- Configured and automated deployments to Dev, QA, and Production environments via Azure DevOps, ensuring controlled and auditable releases.
- Coordinated technical deployments, preventive/corrective maintenance, performance improvements, incident management, and change documentation enabling smooth CI/CD delivery.
- Designed and developed a Windows Explorer-style hierarchical tree module for Smart Cash, enabling intuitive folder/document navigation and document management.
- Built a complete email notification module integrating SendGrid, with custom templates, error handling, and delivery status reporting for transactional communications and critical alerts.

Metronics

Senior Business-Oriented Development Engineer | Jan 2021 – Jun 2021

Bogotá, Colombia

Provided support across multiple platforms. Projects: SIE7E, SIEF, OPERACIONES 360.

- Designed, developed, and implemented dynamic reports using SQL Server Reporting Services (SSRS), enabling key decision-making data visualization.
- Created parameterized and dynamically filtered reports optimizing large-volume SQL Server data queries.
- Integrated SSRS reports with .NET Core applications, enabling report generation and export in PDF, Excel, and Word formats.
- Performed SQL query maintenance and optimization, significantly improving response times and visual output quality.

E.S.E. Hospital Eduardo Santos

Systems Engineer | Sep 2017 – Aug 2020

La Unión, Nariño

- Supported the Systems Engineering department providing technical and operational assistance for health service billing information processing, ensuring accuracy and regulatory compliance.

- Administered and queried PostgreSQL databases, maintaining data integrity for the Compucontac software and Cuentas Médicas RIP module; uploaded data to required external platforms.
- Provided technical support to internal users for medical software, resolving incidents and conducting training on correct tool usage.
- Executed data cleansing, verification, and loading tasks for billing processes, adjusting service codes, rates, and patient data.
- Ensured compliance with RIPS (Registros Individuales de Prestación de Servicios de Salud) reporting standards, guaranteeing file quality and structure for regulatory authorities.
- Performed database backups, maintenance, and structural adjustments to ensure stable institutional system operation.
- Participated in MikroTik router configuration and security camera setup.

Galeras Studios

Full Stack .NET Software Developer | Feb 2016 – Aug 2017

Pasto, Nariño

- Developed enterprise software solutions using .NET, C#, and SQL Server in a full stack capacity.

Indra Company

Software Developer Lab II (Full Stack) | Aug 2013 – Aug 2014

Pereira, Risaralda

- Developed .NET and C# solutions with SQL Server integration in a structured software factory environment.

CONTACTAR

Systems Programmer | Jan 2012 – Dec 2012

Pasto, Nariño

- Developed the FINANCIAL application using .NET and SQL Server (Full Stack), contributing to the complete software development lifecycle.

SIFIZSOFT

Systems Analyst — Financial Business Systems | May 2011 – Dec 2011

Quito, Ecuador

- Developed financial business systems software using C# and SQL Server in a full stack role.

COMERCIACAFE — Asociación de Cafeteros de La Unión

Systems Engineer | Sep 2009 – Aug 2010

La Unión, Nariño

- Managed network infrastructure and provided technical support and equipment maintenance.
